SATETAPONG SANGUANSUK

Full-Stack Developer

Bangkok,Thailand | (+66)81-501-8272 | satetapongs@gmail.com
GitHub: github.com/satetapongsa | LinkedIn: linkedin.com/in/satetapongsa

PROFESSIONAL SUMMARY

Computer Engineering student at Sripatum University focusing on full-stack web development with React, Next.js, Node.js, and TypeScript. Experienced in building responsive web applications, designing relational database schemas with PostgreSQL/Prisma, and setting up automated CI/CD pipelines. Passionate about writing clean, maintainable code, optimizing performance, and building production-ready web interfaces. Actively seeking a Full-Stack Developer internship opportunity to leverage my skills in a real-world, scale-driven environment.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
Backend & Database: Node.js, Express.js, REST APIs, PostgreSQL, Prisma ORM, Supabase, JWT Authentication
Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), VS Code, Postman, Vercel, AWS (Lambda)
Core Foundations: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Design, Clean Code

FEATURED PROJECTS

FinGuard AI - Autonomous Regulatory Intelligence & Policy Mapping Agent **2026 - Present**
Next.js 15 | React 19 | TypeScript | Prisma | Neon Serverless PostgreSQL (pgvector)

- Architected an autonomous multi-agent regulatory workflow for the BFSI sector to automate Bank of Thailand (BOT) circular parsing, version diffing (ADD/MODIFY/DELETE), and internal policy gap analysis.
- Engineered a grounded AI reasoning pipeline with Anti-Hallucination guardrails and Evidence Triad verification, ensuring 100% resistance against adversarial prompt injection and zero-hallucination outputs.
- Implemented strict Human-in-the-Loop (HITL) governance and server-side RBAC, enforcing mandatory compliance officer authorization (WAITING_FOR_HUMAN) prior to dispatching idempotent remediation tickets.
- Secured enterprise data integrity with a cryptographic SHA-256 tamper-evident audit chain, maintaining an unbroken, verifiable record of all agent state transitions and approvals.

Modern-CatchySPU - Smart Distributed Registration & AI-Predictive Scaling System **2026**
Next.js 15 | React 19 | TypeScript | Supabase (PostgreSQL) | Prisma

- Architected a high-concurrency university registration platform utilizing a Database Sharding Architecture across 3 independent node groups to eliminate single points of failure and prevent domino-effect system downtime.
- Engineered an AI-Driven Staggered Scheduling mechanism and an in-engine Linear Regression predictive model to forecast CPU/Memory usage trends 10 minutes in advance, enabling proactive cloud auto-scaling.
- Designed an enterprise-grade Real-time Monitoring Dashboard providing live telemetry, traffic simulation labs, and diagnostic visualization for Shard server health and workload distribution.

AI Parcel Box Damage Detection System **2026**
TypeScript | React 19 | Tailwind CSS v4 | CiRA CORE Edge AI | MQTT | SQLite

- Architected an industrial-grade Edge AI and IoT monitoring dashboard for real-time parcel integrity verification, combining dual-camera optical inspection and machine vision defect classification.
- Engineered an automated decision engine integrating deep learning confidence scoring (CiRA CORE) with load-cell mass anomaly detection (with 5% weight tolerance) to execute deterministic PASS/REJECT sorting workflows.
- Designed a robust Store-and-Forward offline resiliency architecture utilizing local SQLite edge queuing and MQTT protocol to ensure zero data loss during network disruptions.
- Developed responsive enterprise dashboards featuring real-time telemetry, OEE metrics scorecards (Availability, Performance, Quality), and automated pneumatic sorting actuator controls.

EDUCATION

Bachelor of Technology in Computer Engineering **2023 – 2027 (Expected)**
Sripatum University - Bangkok, Thailand
GPA: 2.57
Relevant Coursework: Software Engineering, Web Application Development, Database Systems, Computer Networks, Data Structures & Algorithms.
